*output for white structure, 3000K

Light lines are a beautiful way to highlight the architectural elements of a space. SLD35 can easily be your luminaire of choice for this effect. Boasting a little more presence with a 1.37-inch wide frame, SLD35 is available surface mounted, for both wall and ceiling.

Colors to impress

SLD35's frame is the second thinnest of the family. Let it make an impression with any of its warm anodized color choices, and powder coat finishes black or white.
