\*output for white struc, 3000K

*Pista Track 48V is the ultimate in modern aesthetics, introducing thinner, slimmer magnetic track rails, even smaller light fixtures and ultra-thin cables. But Pista Track 48V isn't just about miniaturization, it's also about personalization. Designers can create unique configurations and play with different modules on single or multiple track rails in different lengths, light effects and colors.*

## Connect spaces

Pista's modularity means that designers can position several tracks together and create continuous paths along ceilings and walls. Its 180°, 90° and flexible connections and twin brackets, enable it to follow you from space to space, and around the corner. As Pista offers surface-mounted, recessed and suspended applications, designers will be delighted to marry function and light with one consistent design. Experiment by creating an ensemble of square or rectangular shapes hovering at different levels, or with a steady line of Pista that travels from one space to another.

## Colors that live

Choose the presence you want to showcase by trying out Pista in different colors. The classic, calming white, the minimalist, accent black, an elegant, warm anodised bronze brushed, or a luxurious, anodised champagne. Dress up the metallic versions with fixtures like Minude, Placebo or Extruded and sit back to admire.

## Wireless, smart control with Casambi

Pista is compatible with Casambi modules, which can control lighting schemes and settings through a Bluetooth Low Energy mesh network, using a smartphone, tablet or switches. After configuration, users can dim all fixtures in a group or individually, set scenes, schedules, and many other intelligent lighting functions. The spots and linear luminaires provide near endless combinations for lighting schemes.
