A portmanteau of ‘cubic’ and ‘mini’, Qbini Frame introduces modular, miniature, recessed LED lighting solutions to residential and hospitality venues and boutiques. Qbini Frame allows to effortlessly express a unique lighting concept in every project. Available in a load of shapes, frames, colors and accessories, Qbini Frame combines choice with exclusive design and high-quality lighting technology.

Small in size, yet great in light quality.

Our smallest recessed portfolio at 1.75" square, Qbini's patented press-in, press-out technology makes installation simple, no screws required. Despite being sources of illumination, each Qbini Frame unit has a tactile, precisely-machined appeal that fits in the palm of the hand.

A playful family

Qbini Frame is made to inspire designers to play with combinations of colors, shapes, accessories, versions, trim (or none), frames of 2,3 or 4 units, or solo. Click and click endlessly. Qbini's minimalist style, light output and light color will add even more versatility, functionality and elegance to your design.

Microprismatic and frosted lenses

We're adding more options to your lighting plan by introducing two new lenses. In addition to providing more visual comfort, they mask Qbini's reflectors thus adding more optical possibilities for lighting plans. The frosted lens widens the light beam and softens the light effect, while the microprismatic lens changes the beam in a more subtle way, softly diffusing light and reducing glare.

Patented precision

Qbini's patented press-in, press-out technology makes installation simple, no screws required.

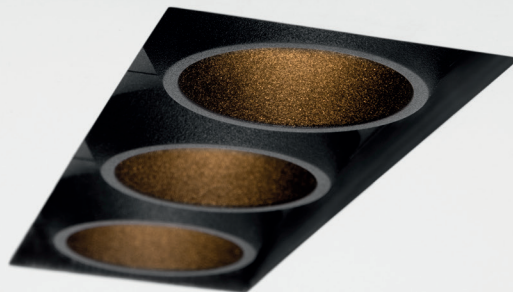

The portfolio's small size, cutting-edge design and dual positioning options (recessed or deep recessed) add a modern yet cosy touch to any intimate space.
